¹ The amount of waste "Received" may not precisely match the sum of the reported amounts for each method of management. This difference reflects information submitted in the reporting tables.

² The majority of recycling takes place at facilities that do not require a permit from the Department and were not required to submit data for this report. Therefore, the amounts shown in this column represent a substantial underestimate of the true recycling rate in the Commonwealth. Based on the local government recycling reports, the statewide average recycling rate for calendar year 2001 was 37.78%. See <http://www.deq.state.va.us/recycle/mandatory.html>. A report on the statewide recycling rate for calendar year 2002 will be issued later this year.

³ "Other" methods of management may include steam sterilization of medical waste, approved use of shredded tires at permitted facilities, and thermal treatment of PCS, among others.
